

Southwester is a white washed wood, straight grain design.

Like all our 3D Laminates, it can be membrane-pressed or vacuum-formed to contoured surface profiles eliminating the need for T-molding, edgebanding, visible seams and special edge treatments.

Referenced SKU is for 250 LY roll. Also available in a 50 LY roll.

Excellent color and grain match to Tafisa Thermally Fused Laminate (TFL) of the same name. Click "Industry Match" icon below for Reference Guide.
